This is our technical & economical offer for

COVID-19 Prevention Materials
General Offer

Subject: COVID-19 Prevention Materials

OilSource Inc., a specialized firm in international trade and logistics, partnered with L’ehcar Hospitality to present this techno-economic proposal for your consideration. It is based in our research for the best quality and cost on the products offered in the market. We have reached volume agreements with the manufacturers to ensure a competitive price for retail users.

AUMACOM KN-95
Daily Protective Face Mask (for adults).

We are offering Disposable Protective Masks category KN95 for adults from the recognized brand AUMACON. The masks offered provide maximum protection to stop contaminating microparticles and droplets in air suspension. This is particularly adequate for protection from bacteria and viruses. This mask establishes a multiple protection system, is resistant to moisture and its robust construction gives it an excellent durability.

Technical Specifications.
• Filter sheet made of 100% cotton.
• The sheet fabrication technique is fusion blown (Not woven).
• Quintuple layer system offers nanoparticle retention for 0.3 microns particle size or larger.
• Filtering Efficiency for Viruses and Bacteria. BFE≥98%.
• Adjustable nose clip.
• General facial anatomical fit.
• High density sponge for extra-fit to the face.
• Comfortable elastic ear clips.

Packing: The product is normally delivered in cartons. A carton contains 40 boxes of 20 units (800 pieces). Each unit is packaged in an individual plastic bag. Carton dimensions are L24” x H12” x W19” and weight is 18 lbs.

NIOSH & FDA classification for KN95: The KN95 mask is one of nine NIOSH (National Institute for Occupational Safety and Health) certified particulate respirators. Taking the N95 mask as an example, "N" means that it is not oil resistant. "95" means that the concentration of particles within the mask is at least 95% lower than that outside the mask, when exposed to a specific number of standardized test particles. It should be noted that 95% is not the average filtering rate, but the minimum value. Also the KN95 classification has been approved by the US Federal Food and Drug Administration. (FDA).

N95 is a mask classification and not the name of a specific product. As long as the product complies with the N95 standard and passes the NIOSH revision, it can be classified as "N95 mask". The degree of protection is also referred as “N95”, which means that, under the test conditions specified in the NIOSH standard, the filter efficiency of the mask filter material for non-oily particles (such as dust, acid mist, paint mist, microorganisms, bacteria, viruses, etc.) reaches at least 95%. The offered classification meets the filtering efficiencies and is presented as a technically valid and accepted alternative to the N95 classification.
YBUYOO A1865
Reusable Nano Antiviral & Antibacterial KN95 Mask.

We are offering our Ybuyoo A1865 - Nano Antibacterial & Antiviral KN95 Mask. This is a re-usable Protective Mask category KN95 from the recognized brand YBUYOO. The KN95 classification has been approved by the US Federal Food and Drug Administration (FDA). The masks offered provide maximum protection to stop contaminating microparticles and droplets in air suspension. The unique characteristic of this mask is that it is particularly adequate for killing bacteria and de-activating viruses. This mask establishes a multiple protection system, is 100% waterproof.

Technical Specifications.
- Shell life: 3 years.
- Bacteria Killing efficiency >= 99% & Virus De-Activating efficiency >= 99%.
- General facial anatomical fit with adjustable nose clip & comfortable elastic ear bands.
- Reusable after disinfection with 75% min Ethanol spry (up to 20 uses).
- Colors: White, Gray, Pink & Light blue.

Packaging.
The product is normally delivered in cartons. A carton contains 40 boxes of one unit each. Each piece is individually packaged in a safety bag.
AUMACON
Surgical 3-Ply Face Mask with ear loops

We are offering Disposable Surgical Masks from the renowned AUBACON brand. The masks offered are surgical grade, three layered construction and disposable. Attachment is made by anatomically adjustable nose pad combined with elastic earmuffs that provide a snug fit for full protection while remaining light and comfortable.

The polypropylene outer lining offers an effective and fluid barrier to the passage of air, while the inner linings guarantee high filtering efficiency, comfort and breathability. Disposable surgical masks cover your nose, mouth, and chin, offering total protection. One size fit all for adult men and women.

Applications include: Hospital use, dental clinics, laboratories, food industry, specialized industrial spaces requiring dust-free environments, electronics manufacturers, people with respiratory conditions, Preventive use of contagion on the street (healthy people).

**Technical Specifications.**
- Manufacture of the mask based on three layers. Moisture proof Polypropylene External Sheet (25 gr/m2). Filtering intermediate sheet (25 gr/m2) and Poly Melt-Blown soft cotton inner sheet (25 gr/m2).
- The sheet forming technique is fusion blown (Non-woven fabric).
- Union of the layers by ultrasonic welding.
- Stops microdroplets and particles up to 2.5 microns (PM 2.5)
- Filtration efficiency of salty media ≥ 90%
- Filtering Efficiency for Viruses and Bacteria. BFE≥95%.
- Adjustable nose clip.
- Comfortable elastic ear clips.
- Light Blue and White Color.
- Measurements: 9.5 cm wide x 17 cm long.

**Packing.**
The product is delivered in cartons. The typical configuration is a carton containing 20 boxes of 5 bags (10 units/bag). In this case the cardboard (with 1000 pieces) weighs 9.00 Kgs.
SHUFANG KN-95
Children Masks

We are offering Disposable Protective Masks category KN95 from the recognized brand SHUFANG. The masks offered provide maximum protection to stop contaminating microparticles and droplets in air suspension. This is particularly adequate for protection from bacteria and viruses. This mask establishes a multiple protection system, is resistant to moisture and its robust construction gives it an excellent durability.

3. Technical Specifications.
• Type specially designed for children.
• The mask filter is made in 3D structure comprising a quadruple layer system that offers nanoparticle retention for particle size 0.3 microns or larger.
• Non-woven Anti-static material for external layers. It absorbs moisture and is soft and skin-friendly.
• Inner layers of nonwoven, meltblown material that effectively filter bacteria and viruses with an efficiency of $\text{BFE} \geq 98\%$
• It adapts perfectly to the contour of the face to offer complete protection, ensuring sufficient breathing space. Comfortable elastic ties that attach to the ears.
• Shelf life: 26 months.

4. Packing.
The product is normally delivered in cartons. A carton contains 200 boxes of 10 units each. (2000 pieces). Carton dimensions are L26” x H12” x W19” and weight is 34 lbs.
KAMBO
UV Sterilized
Disposable Children Masks

We are offering Disposable Children Masks from the renowned KAMBO. The masks offered are specifically designed for children use, three layered construction and disposable. Attachment is made by anatomically adjustable nose pad combined with elastic earmuffs that provide a snug fit for full protection while remaining light and comfortable. It is fully applicable for the daily care of children.

01. The outer lining is made of Water-resistant spunbonded cloth. It prevents fog moisture for infiltrating. 02. The middle layer is made of Meltblown filtering cloth and provides an effective blocking of micro bacterial dust and 03. the inner lining is made of Hydrophilic spunbonded cloth able to absorb sweat and skin grease, it is soft, odorless, anti-allergic and skin friendly. None of the layers has any Formaldehyde content. The design includes wider ear bands that makes ear less compresses and more comfortable for children.

Technical Specifications.
• Manufacture of the mask based on three layers.
• Filtering Efficiency for Viruses and Bacteria. BFE ≥ 95%.
• Adjustable nose clip.
• Comfortable elastic ear clips with wider ear band.
• Colors: Solid Light Blue or and White Color.
• Measurements: 9.0 cm wide x 14.0 cm long.
• Shelf life: 2 years.

Packing.
Each UV sterilized mask is packaged in an individual clear bag. The masks are packaged in boxes containing 50 units each. Box dimensions & weight: 7-5/8 x 4-1/2 x 4-3/8" & 0.54 lbs.
PACOM PC-686
Non-Contact Infrared Thermometer

We are offering Multi-Purpose Non-Contact IR Thermometer Model PC-868. This is a multifunctional infrared thermometer which is primarily used to measure the skin temperature of the human body, although it works perfectly also to measure temperature of solid surfaces, liquids and food.

User can select to get either Celsius (°C) or Fahrenheit (°F) readings. It is extremely fast and accurate. Temperature measurement is done aiming the instrument at 1-1/4” to 2” distance from subject. The human body Temperature measurement is done without contact with the skin so its use is very healthy and safe, preventing any cross-infection.

Temperature Measuring Ranges are: 89.6-109.2°F for human body and for pets and 32-212°F for other surfaces (solids or liquids). For human temperature measurement the instrument gives a “Normal Temp” **GREEN screen** for an 86-99.3°F range, a “High Temp” **ORANGE screen** for a 99.5-100.2°F range and a “Very High Temp” **RED screen** for a 100.4-109.4°F range. Customizable Alarms Values can be set. PC868 can store up to 99 sets of data. The query interface can display memory serial number, body mode and recorded temperature values. Auto Power Save mode is available.

### Technical Specifications

- **Measurement modes**: Forehead and Surface temperature modes.
- **Power supply**: 3VDC, 2 x AAA Batteries (not included).
- **Measuring Range**: For Forehead Temperature: 89.6-109.2°F. For Surface Temperature: 32.0-212.0°F.
- **Measuring accuracy**: (At lab conditions) ± 0.2°F @ 95.9-107.6°F. ± 0.3°F @ 89.6-95.7°F and 107.8-109.4°F.
- **Clinical repeatability**: Within ± 0.3°F.
- **Resolution of display**: 0.1°F.
- **Normal Operation**: 50-104°F, Relative Humidity 15-85%.
- **Storage condition**: -13°F to 122°F, Relative Humidity ≤ 95%.
- **Size**: 5.9”(H) x 3.7”(L) x 1.8”(W).
- **Weight**: 0.32 lbs.
- **High body temp. Hint**: ≥100.4°F.
- **Waterproof Grade**: IP22.
- **Electric shock**: Internally powered ME equipment.
- **Applied part**: Type BF applied part, including the whole unit.
- **Mode of operation**: Continuous.
- **Product life**: 5 years min.
- **Software version**: V1.0.
- **Notes**: Not intended to be sterilized. Not for use in Oxygen Rich Environment.
- **Disclosure**: This product is FDA Certified.

**Faster Testing.** Medical Grade Instant Digital Thermometer great for use in kids, infants and adults in just ONE (1) second. It is faster than conventional thermometers, thanks to a refined superior microchip and overly sensitive sensor which allows for rapid Non-contact scans of people as well as objects and rooms.

**Higher Accurate Reading.** Enjoy Hospital Grade Accuracy at your home, clinic, or workplace in confidence due to the thoroughly tested reliable of your healthcare thermometer. Temperature measurement deviation up to +/- 0.2°C.

**Great Versatility.** The thermometer enables you to measure room or Bottle temperature instantly with the press of a mode button. It is a perfect choice for Moms and Dads who want to keep a close eye on the body temperature of babies, children and loved ones.

**Easy to Use.** Baby, Toddler and Child-friendly quiet mode tympanic scanning with the push of a button allows you to take instant scans of infants and children without a beeping noise that may wake them.

**Easy to Read.** Temperature will be displayed on the LCD screen with clinically proven accuracy you can rely on. The back-LCD display shows you what the temperature is, even easily readable in the dark.

Manufacturer.
Shenzhen Pacom Medical Instruments Co. Ltd. This firm specializes in the manufacture of Health Care instruments since 2003. The company possesses the latest technology and advanced equipment for the design and production of Digital thermometers, Infrared Thermometers and Blood Pressure Monitors. With many years of development and innovation the products are manufactured in strict accordance to EN and USA standards. The factory is ISO 13485:2003, CE and FDA 510(K) approved.
DOUBLEZERO1
Non-Toxic
Non-FLAMMABLE
Liquid Cleaner
Degreaser & Disinfectant

Double Zero 1 is an All-purpose Cleaning Solution. Its composition is based in an extremely weak and pH stabilized Hypochlorous Acid solution in water. Double Zero 1 is safe and effective for everyday use to clean our hands, clothes, and all surfaces.

Due to its water-based composition it is a NON-FLAMMABLE liquid and do not pose fire risks as the ones present with alcohol-based hand sanitizers.

Electrolyzed water, producing Hypochlorous acid, render an all-natural, non-toxic, and non-hazardous solution that can be used for disinfecting or degreasing. As a disinfectant, it is 100 times more powerful than chlorine bleach. As a cleaner and degreaser, it can effectively dissolve water-insoluble substances.

It can be applied safely to the skin as a strong disinfectant. Just spray and rub your hand together and to have them clean and safe from viruses and bacteria. It can also be used to clean the house from the countertops to the bathroom with an easy application of spraying and wiping the surfaces that you need to disinfect.

Sizes Double Zero is presented in 2.0 oz and 8.0 oz canisters.

Disclaimer: Double Zero 1 is safer to use that Bleach and Hand Sanitizers. It is Lab tested and EPA Listed. Made in USA.

Log Reduction Time Data of Selected Pathogens.

The table below show 99.999% reduction of bacteria and yeast after 30 seconds to 4 min exposure to 30 ppm and 50 ppm hypochlorous acid. For viral pathogen, 99.9% reduction can be achieved after one minute or 5 minutes with 50 ppm and 200 ppm hypochlorous acid.

Health-Tec
PURE TOUCH 300
Nitrile Examination Gloves
Powder-Free

We are offering our Health Tec - PURE TOUCH 300 Powder-free Nitrile Examination Gloves. Health-Tec Pure Touch Nitrile Gloves are designed with soft, pliable nitrile material. Our gloves offer superior elasticity for less pressure and improved comfort.

Technical Specifications
• Micro-textured fingertips
• Powder free
• Not made with natural rubber latex
• Ambidextrous
• Disposable/Single use
• Color: Cobalt Dark Blue

These gloves comply with ASTM and EN standards and are intended for medical use in non-sterile environments.

Inspection method: ASTM D6319

Sizes: x-Small, Small, Medium, Large & X-Large.

Packaging.
The product is normally delivered in cartons. A carton contains 10 boxes. For sizes x-Small. Small. Medium and Large each box contains 300 units (150 pairs). For X-Large size each box contains 200 units (100 pairs). Box is 9-5/8 x 5 x 3-1/4” & 2.15lbs. Carton is 10-1/2 x 10 x 17” & 23 lbs.
Anti-Splash & Anti-Fog Full Face Shield.

We are offering our Anti-Splash & Anti-Fog Full Face Shield. Wrap-around design provides over-the-top, side, and front face protection. It is very comfortable as adjustment to the head is done by a breathable foam that gently touch the forehead.

An adjustable elastic band guarantee the perfect fit to the head. Upgraded PET clear face screen provides excellent transparency and ultra-wide vision experience. The shield surface is treated with anti-fog and anti-static coating to improve maximum visibility. It is easy to clean and is suitable for extended wear.

This face shield is a protective isolation mask, designed to cover the whole face from spray and splatter, liquid droplets, dust, oil smoke and other air suspended particulates. It brings a deterrent for aerosol flows containing contaminants, bacteria or viruses. It shields the wearer from coughs, sneezes and saliva. Excellent for close team work as it does not get in the way of communication with other colleagues.

Automatic IR Sensing Liquid Dispenser

We are offering our Automatic Liquid Dispenser Model HS-1806. This dispenser works with both water-like and liquid gel hand sanitizers.

Internal container of large refillable capacity. The dispenser can be used on average more than 30,000 times on standard set of new batteries. Its is made from safe & durable engineering plastics. It can be mounted on a stand or a wall. Includes an infrared sensor for fully automatic non-touch operation, not affected by light intensity.

Simply place your hand under the sensor at an effective distance of about 1” to start the soap or sanitizer dispenser. It can be controlled to a single or double liquid dosage.

Effectively avoid germs or infection without making physical contact with dispenser. Suitable for public and private environments.
